

WATER QUALITY ADVISORY

Bourke Creek Improvement District has issued a WATER QUALITY ADVISORY for its users as of today, October 19, 2020.

Interior Health has requested that we issue a Water Quality Advisory due to recent heavy rains and Fall runoff (Freshet) which has increased the water turbidity. Turbidity is a measurement of how much suspended solids there are in the water.

A **NTU** (*Nephelometric Turbidity Unit*) is the unit of measurement of turbidity.

This is not a BOIL WATER ADVISORY. HOWEVER:

Until notified, users:

- with weakened immune systems, &/or wishing additional protection should take precautions when drinking, washing fruits & vegetables, making beverages or ice, or when brushing teeth
- Boil water rapidly for a least 1 minute, or use an alternate, safe source of water
